

Brigham and Women's Hospital
Job Title: Full-Time 24/7 Emergency Radiologist

Job Description:

The Department of Radiology at Brigham and Women's Hospital (BWH) is seeking an ABR-certified radiologist to join a thriving and well-established Division of Emergency Radiology at our academic Boston Level 1 trauma center.

Our Division is one of the largest and most advanced academic Emergency Radiology groups in the country, and operates 24/7/365 from our reading room centrally located within the BWH Emergency Department (ED). Our Emergency Radiologists oversee all aspects of diagnostic imaging for BWH ED patients, and provide rapid turn-around emergency teleradiology services to multiple regional hospitals and radiology practices. Our imaging spans all organ systems and modalities including CT, ultrasound, radiography, and MRI. We train a bright group of residents and three Emergency Radiology fellows each year. We value our excellent collaborations with Emergency Medicine, Surgery, the Trauma service, and our other radiology department specialty Divisions. Academic engagement is an important component of our mission, including original research, teaching initiatives, contributions to departmental administration and engagement with the broader Emergency Radiology community via the American Society of Emergency Radiology.

The clinical schedule includes a mix of shifts throughout the 24 hour cycle, but is weighted towards late evening and overnight shifts, with ample non-clinical time to allow for sleep recovery and academic productivity. Compensation and benefits packages are highly competitive.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, or any other characteristic protected by law. Women and underrepresented minorities are encouraged to apply.

Job Requirements:

Candidates must have a demonstrated career interest in the subspecialty of Emergency Radiology, must have excellent clinical skills in all modalities and organ systems (including neuro and ultrasound), and must be able to work in a fast-paced adrenaline-filled environment while remaining calm under pressure. Fellowship training is preferred, and/or several years of substantial Emergency Radiology experience.

A proven academic track record with an established research portfolio is strongly

preferred in order to achieve expected Harvard Medical School promotion to Assistant Professor within the first few years of employment. You will be expected to engage fully in both the clinical and non-clinical activities of the section, including substantial contributions in research, education, and/or sectional administration.

Interested candidates should forward a CV, cover letter (including a description of your academic accomplishments and future goals), and names and contact information of three references (letters will be required prior to invited interviews) to:
