Within the Department of Pediatrics at Massachusetts General (MGH), and Mass General Hospital for Children (MGHfC), the Division of Pediatric Gastroenterology, Hepatology and Nutrition invites applications for a full-time position as a Pediatric Gastroenterologist/Hepatologist and director of the Hepatobiliary Center in our Division with advanced training and/or experience in Pediatric Transplant Hepatology.

Commensurate with experience, education, achievements and other qualifications, the candidate will be eligible for an appointment at Harvard Medical School as an Instructor, Assistant, or Associate Professor, provided the candidate teaches Harvard-associated learners for at least 50 hours/year.

The Pediatric Gastroenterologist/Hepatologist will be part of a clinical team in the Division of Pediatric Gastroenterology, Hepatology and Nutrition in the Department of Pediatrics. The Pediatric Gastroenterologist/Hepatologist will provide outpatient and inpatient care, focusing primarily on transplant hepatology and liver disease, in addition to general pediatric gastroenterology and clinical outreach activities at MGH/MGHfC satellite clinics. Although the primary focus of this position is clinical service, there are opportunities for academic work, including education, collaborative clinical research and investigation, administration and advocacy.

The candidate’s primary focus will be as a clinician/educator, with the potential for involvement in clinical research. Of particular interest is the recruitment of individuals with expertise and interest in, clinical effectiveness and/or translational science to complement a rapidly growing clinical and translational research program. MGH/MGHfC seeks candidates whose experience, teaching, research and community service has prepared them to contribute to our commitment to excellence and diversity.

The Division of Pediatric Gastroenterology, Hepatology and Nutrition includes 20 successfully established pediatric gastroenterologists, who provide care to patients representing the entire spectrum of gastrointestinal conditions. The program accepts and trains two fellows per year in an accredited Pediatric GI training program. The Division provides patient- and family-centered care to its large patient base in the greater New England region. MGHfC offers the dual advantage of the resources of a children’s hospital within the internationally renowned Massachusetts General Hospital, which is consistently ranked as one of the best general hospitals in the world. Our pediatricians benefit from being part of an extensive, academic health care campus with outstanding clinical resources and research activities within the Mass General Brigham system, the largest health care network operating within the greater Boston area. Interested candidates should submit a curriculum vitae and a one-page narrative of clinical, teaching and research interests via electronic submission to:

Alessio Fasano, MD
Chief, Division of Gastroenterology and Nutrition
