The Department of Pathology at Brigham and Women’s Hospital, a teaching affiliate of Harvard Medical School, is seeking an academically oriented, Board certified faculty pathologist with appropriate training and established skills in gynecologic pathology, basic and translational research and multidisciplinary investigation. Interest or experience in perinatal pathology will be considered beneficial. The search is prompted by service growth and the goal is to fill the position soon, if possible. The Division of Women’s and Perinatal Pathology is one of a few clinical services in the United States in which gynecologic and fetal pathology is practiced as a dedicated subspecialty with its own full-time faculty, exclusive specimen triaging and distinct divisional infrastructure. It serves an active Obstetrical and Gynecologic service, with over 15,000 surgical and consult specimens per year, including at least 75 fetopsies and 25 perinatal autopsies per year. The environment provides substantial opportunities for clinical/translational research as well as collaborations with investigators in multiple Harvard-affiliated institutions, including the Dana Farber Cancer Institute, wherein there are busy multidisciplinary oncology programs, and Children's Hospital Boston. Applicants should be committed to excellent patient care, as well as research, scholarship, and effective teaching. Academic rank at Instructor, Assistant or Associate Professor and salary will be commensurate with experience and accomplishments.

Please send curriculum vitae and names and addresses of three references to
Marisa R. Nucci, MD
Vice Chair and Director, Women's and Perinatal Pathology
Department of Pathology
Brigham and Women’s Hospital
75 Francis Street
