Academic Stroke Neurologist.

Department of Neurology, Brigham and Women’s Hospital.

Brigham and Women’s Hospital is seeking a board-certified Neurologist (M.D.) with an interest in vascular neurology, preferably with subspecialty certification or vascular neurology training. The candidate will be hired as an Associate Neurologist with inpatient and outpatient clinical duties but is also expected to participate in quality improvement initiatives and/or teaching of residents, fellows, and physician assistants, and/or clinic research.

Clinical duties are divided between two locations, the main campus at the Brigham and Woman’s Hospital in Boston and a site 15-20 miles south of the city in South Weymouth Ma. More than half of the time will be spent at the south shore location. A weekly clinic at the Boston location is dedicated to vascular neurology. Clinics at the south shore satellite are weighted towards neurovascular cases with a mix of general neurology. Three or four days a month are spent covering inpatient and emergency room neurological consultation at the South Shore Hospital, an affiliate institution.

An academic title of Harvard Medical School Clinical Instructor, Assistant Professor or associate Professor is conferred commensurate with experience and prior academic work. A commitment to clinical excellence and to clinical teaching is sought.

Brigham and Women’s Hospital is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law. We strongly encourage applications from women and minorities.

Candidates should possess a Massachusetts license to practice medicine. Additional conditions of employment are provided via this link:

https://www.partners.org/For-Medical-Professionals/Employment-Conditions.aspx
