The Division of Gastroenterology at Massachusetts General Hospital welcomes applications from qualified individuals for a full-time clinical position in our Liver Transplant program. The MGH GI Division and Transplant Center are at the forefront of clinical care, fellowship training, and investigation in hepatology and transplantation. Candidates must be board certified in gastroenterology and hepatology and possess proficiency in the management of liver disease. Clinical experience in the pre-transplant, transplant evaluation, and post-transplantation phases of care is required. Completion of an advanced hepatology fellowship is encouraged. Successful candidates will exhibit strong consultative and endoscopic skills in both the outpatient and inpatient settings and the ability to work collaboratively with a multidisciplinary team. Applicants must be committed to teaching as a requirement for this position. Experience and interest in clinical or translational research are advantageous. Initial appointment can be at the Instructor, Assistant, or Associate Professor level at Harvard Medical School commensurate with qualifications, and in the Gastroenterology Division, MGH. Affirmative Action /Equal Opportunity Employer. Inquiries by women and underrepresented minority applicants are encouraged.

Please submit CV or inquiries to:
