Massachusetts General Hospital
Massachusetts General Hospital for Children
Assistant in Pediatrics/ Assistant Pediatrician/ Associate Pediatrician

The Division of Pediatric Endocrinology at Massachusetts General Hospital (MGH) and Mass General Hospital for Children (MGH/C) invites applications for a full-time position as an Assistant in Pediatrics, Assistant Pediatrician or Associate Pediatrician to join a multidisciplinary team of clinicians and researchers. Candidates will be eligible for appointment at Harvard Medical School as Instructor, Assistant or Associate Professor, if they teach Harvard associated learners at least 50 hours/year, commensurate with qualifications, achievements and experience. The successful candidate will have earned an M.D. or M.D./Ph.D. or equivalent and be BC/BE in Pediatrics and Pediatric Endocrinology.

As a clinical innovator, the applicant must have expertise in outpatient clinical activities, inpatient attending responsibilities, and teaching and mentorship of students, residents and pediatric endocrinology trainees. The division is in the process of expanding its subspecialty clinics, and the candidate may have the opportunity to develop a subspecialty niche depending on his/her area of interest and/or expertise. A portion of his/her time may be devoted to research and other scholarly activities. Applicants interested in leadership positions may have the opportunity to develop this interest.

The Division of Pediatric Endocrinology consists of fourteen successfully established pediatric endocrinologists, providing care to patients representing the entire spectrum of endocrine conditions. The Division of Pediatric Endocrinology provides patient and family centered care to its large patient base, and includes five nurse certified diabetes educators, a dietician and a psychologist. MGH/C offers the dual advantage of a children’s hospital within the internationally renowned Massachusetts General Hospital, consistently ranked as one of the best general hospitals in the world. Pediatric endocrinologists and other pediatric specialists benefit from a vast campus with outstanding clinical resources and research activities within the Mass General Brigham system, the largest health care network operating within the greater Boston area.

Interested candidates should send curriculum vitae and a brief letter outlining their interests to:

Madhusmita Misra, MD, MPH
Chief, Division of Pediatric Endocrinology
Department of Pediatrics
Massachusetts General Hospital
55 Fruit Street, CPZS 5-539
Boston, MA 02114
Attn: Nancy Radford

Electronic submission to mmisra@mgh.harvard.edu is strongly encouraged.
