The Massachusetts General Hospital (MGH) Cardiovascular Research Center (https://cvrc.massgeneral.org) invites applications for faculty positions at the Instructor, Assistant Professor or Associate Professor level. The faculty appointment will be in the Department of Medicine at Massachusetts General Hospital. The positions provide an attractive start-up package and outstanding opportunities for collaboration with basic and translational investigators across the MGH, Harvard, Broad and MIT scientific communities.

Applicants must hold a PhD and/or MD degree (or the equivalent). Applicants are expected to develop a program of scholarly investigation in basic or translational cardiovascular research, including cardiac or vascular signaling, physiology, metabolism, genetics, development, regeneration, or therapeutics. Development of novel scientific approaches and technologies that could have broader impact on these areas is a priority.

The applicant will be expected to contribute to the teaching of medical students, graduate students, residents, and research fellows in the MGH and Harvard Medical School systems.

Interested candidates should email as a single PDF a cover letter, detailed curriculum vitae, NIH biosketch, a list of 3-4 references, and a short description (~2 pages) of future research plans by 14 January 2021 to:

Paul B. Yu, M.D., Ph.D.
Director, Cardiovascular Research Center
