Brigham and Women’s Hospital (BWH) seeks applicants for a faculty position who have established well-funded research programs in the applications of biomaterials to solve problems in regenerative medicine and point of care diagnostics. Candidates will have an MD, PhD or both and be accomplishments researchers with extensive independent publication records and effective mentors. The successful candidate will engage in teaching fellows, medical students and undergraduate and graduate students. Academic rank of Assistant or Associate Professor at Harvard Medical School and hospital rank of Associate Bioengineer at BWH will be commensurate with experience, training and achievements.

The Division of Engineering in Medicine at BWH benefits from an outstanding body of faculty and trainees engaged in cutting edge translational research with multiple collaborations throughout the Harvard ecosystem. Please forward a cover letter, curriculum vitae, statement of research interests, and copies of up to three representative papers. We encourage candidates to apply by November 15, 2021 but will continue to review applications until the position is filled.

Applications should be sent to:

Joseph V. Bonventre, MD, PhD
Chief, Division of Engineering in Medicine
Brigham and Women's Hospital
mramos19@partners.org

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related conditions or any other characteristic protected by law. Women and minority candidates are particularly encouraged to apply.
