The Division of Gastroenterology at Massachusetts General Hospital welcomes applications from qualified individuals for a full-time clinical position in our General Gastroenterology program focusing on gastrointestinal complications from cancer therapy. The MGH GI Division is at the forefront of clinical care, fellowship training, and investigation in Gastroenterology and Hepatology. Candidates must be board certified in gastroenterology and possess proficiency in the management of general gastrointestinal disease, but do not have to have specific training in cancer-related care. Ideal candidates would be interested entering an emerging field of gastroenterology at the intersection between gastroenterology, immunology, and oncology. Interest in inflammatory diseases of the gut beyond inflammatory bowel disease, including Eosinophilic Esophagitis, is also encouraged. Successful candidates will exhibit strong consultative and endoscopic skills in both the outpatient and inpatient settings and the ability to work collaboratively with a multidisciplinary team. Applicants must be committed to teaching as a requirement for this position. Experience and interest in clinical or translational research are advantageous. Initial appointment can be at the Instructor, Assistant Professor level at Harvard Medical School commensurate with qualifications, and in the Gastroenterology Division, MGH. Affirmative Action/Equal Opportunity Employer. Inquiries by women and underrepresented minority applicants are encouraged.

Please submit CV or inquiries to:

Michael Dougan, MD, PhD, Director, GI Cancer Complications Center
Massachusetts General Hospital
Division of Gastroenterology
55 Fruit Street, Wang 5
Boston, MA 02114
or via email to LGURSKA@mgh.harvard.edu

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
