Seeking Thyroid Specialist – Endocrine Physician

Description

Full-time physician sought by the Massachusetts General Hospital/MGPO – Endocrine Division to perform clinical duties across our clinical services, including outpatient and inpatient care. The Physician will see patients with thyroid cancers, thyroiditis, and other endocrinopathies affecting the thyroid and parathyroid glands. The incumbent will have teaching responsibilities and academic appointment will be at the Instructor, Assistant, or Associate Professor level at Harvard Medical School and determined by the applicant's credentials.

Please submit CV and letter of interest by email to Lynette Desharnais at ldesharnais@partners.org.

Requirements

Requires M.D. or D.O. degree or equivalent with training in Internal Medicine and Endocrinology via completion of ACGME-accredited residency in internal medicine and a fellowship in Endocrinology, Diabetes, and Metabolism. Must be board certified in Endocrinology.

We strongly encourage Black, Indigenous, and other People of Color to apply as well as LGBTQ-diverse applicants.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
