The Department of Medicine at Massachusetts General Hospital (MGH) invites outstanding laboratory-based physician scientists to apply for a faculty position within the Center for Immunology and Inflammatory Diseases (CIID) and the Division of Rheumatology, Allergy and Immunology (DRAI). Appointment as an Assistant or Associate Professor at Harvard Medical School will be commensurate with experience, training and achievements in addition to teaching activities. A competitive start-up package will be provided.

We are seeking highly motivated individuals with demonstrated potential for creativity and excellence in the field of rheumatology. Applicants whose research programs address any area of immune mechanisms of rheumatic disease are encouraged to apply. Areas of particular interest include human translational immunology, infectious triggers of autoimmunity and systems-based -omic approaches to autoimmune rheumatic diseases. The laboratory space will be within the MGH CIID, a diverse interactive group interested in basic mechanisms of immune-mediated diseases. The CIID offers outstanding resources in many areas, including single-cell genomics, flow cytometry, and imaging. Applicants may have an MD or MD/PhD degrees and should be board-certified or -eligible in rheumatology and will be expected to participate in the teaching of fellows, house staff and Harvard Medical and Graduate School students. Applicants should submit a CV, research plan, cover letter, and the names of three references (address, phone, e-mail) to Dr. Andrew Luster c/o CIIDsearch@mgh.harvard.edu by May 1, 2022.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic by law.
