Faculty physician – Department of Orthopedic Surgery and Sports Medicine, Boston, MA

The Female Athlete Program in the Department of Orthopedic Surgery and Sports Medicine at Boston Children’s Hospital and Harvard Medical School is seeking a Sports Medicine Physician with experience in treating female athletes, particularly Relative Energy Deficiency in Sport and eating disorders. Further experience with diagnostic ultrasound is preferred.

The Female Athlete Program includes an interdisciplinary clinical care team consisting of physicians, surgeons, dietitians, and sports psychology clinicians. We are part of the Wu Tsai Human Performance Alliance and have a large clinical research infrastructure.

Responsibilities include clinical practice, resident and fellow education, and clinical, translational and/or basic science research. Salary and academic rank of Instructor, Assistant or Associate will be commensurate with experience and academic credentials. Board certification in sports medicine is required.

Boston Children’s Hospital is a 415-bed comprehensive center for pediatric and adolescent health care in Boston, MA, affiliated with Harvard Medical School. The Female Athlete Program is an international leader in female athlete care and research. Boston Children’s Hospital is an equal-opportunity employer; women and minorities are encouraged to apply.

Interested candidates should send letter of inquiry and curriculum vitae to marguerite.cramer@childrens.harvard.edu, addressed to:

Dr. Kathryn Ackerman
Director, Female Athlete Program

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
