The Massachusetts General Hospital (MGH) Center for Health Outcomes and Interdisciplinary Research within the Department of Psychiatry invites applications for a faculty position in Aging and Community-Engaged Research at the Instructor or Assistant Professor level. The faculty appointment will be in the Departments of Psychiatry at MGH and Harvard Medical School (HMS). The position provides outstanding opportunities for collaboration with translational investigators across the MGH, Mass General Brigham, and the Harvard scientific community.

Applicants must hold a PhD in Psychology and have growing expertise in gerontology/geriatrics and community-engaged research. The successful candidate will develop a program of research in any of several potential areas of research in gerontology and community-engaged research, including development, testing, and implementation of psychosocial interventions for older adults and caregivers in the hospital, community, and skilled nursing facilities. Research addressing the needs of vulnerable and disadvantaged groups is highly desirable. The candidate will be expected to collaborate with investigators in the Center for Health Outcomes and Interdisciplinary Research and the wider research community at the MGH. The applicant will also be expected to contribute to the teaching of clinical psychology and of postdoctoral fellows within the Center for Health Outcomes and Interdisciplinary Research, the Department of Psychiatry and other Departments within the MGH and HMS systems.

Qualified candidates must have a Ph.D. degree in clinical psychology with specialization in Geropsychology, and a strong research track record with a focus on aging and/or community-engaged research. A license to practice clinical psychology is required and being licensed to practice in Massachusetts is preferred.

Interested candidates should send a personal statement indicating their research interests, the names of three potential referees, and a Curriculum Vitae to Ms. Kelly Horan, Program Manager within the Center for Health Outcomes and Interdisciplinary Research. khoran@partners.org

We are an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions, or any other characteristic.
