Academic Physician in Advanced Cardiac Therapies

The Advanced Cardiac Therapies Program of the Department of Cardiology at Boston Children's Hospital (BCH) is actively recruiting a faculty physician with advanced training and experience in anticoagulation, cardiomyopathy, mechanical support, and heart transplant to join our well-established team. Candidates must be Board Certified or Eligible in Pediatric Cardiology with additional advanced training in heart failure and transplant. Candidates should possess strong clinical, teaching, and leadership skills, and strong academic potential. Applicants should have excellent clinical skills to serve as an attending in the inpatient and outpatient setting of this robust service as well as an interest in anticoagulation. Quality improvement is essential to the success of our program and a high priority of the institution and candidates with QI experience is preferred. An academic appointment at Harvard Medical School will be sought at a rank of Instructor or Assistant Professor commensurate with qualifications.
