Pediatric Transplant Surgeon

The Department of Surgery at Boston Children's Hospital seeks to recruit a full-time faculty member who is fellowship trained in abdominal organ transplantation with expertise in pediatric liver and kidney transplantation. Successful candidates should have already completed an ASTS approved fellowship in liver and kidney transplantation with significant pediatric transplantation experience during or after fellowship. We seek to recruit a pediatric transplant surgeon who is either already fellowship trained in Pediatric Surgery, or who is willing to undergo such training after recruitment. The selected candidate will join the Department of Surgery under the leadership of Dr. Steven J. Fishman. The dual specialty trained candidate will become a member of the Pediatric Transplant Center under the leadership of Dr. Heung Bae Kim which includes programs for liver, intestine, multivisceral and kidney transplantation in children. In addition, the candidate will also be involved in specialized Pediatric Surgery based centers including the Midaortic Syndrome and Renovascular Hypertension Center and the Liver Tumor Center of Excellence (in collaboration with the Dana-Farber Cancer Institute).

Faculty rank will be commensurate with qualifications and experience of the successful candidate at the Instructor, Assistant Professor or Associate Professor levels at Harvard Medical School. A strong commitment to teaching, research, and clinical care is required.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.

Please forward a Curriculum Vitae and inquiries to:

About Boston Children’s Hospital

Boston Children's Hospital is home to the world's largest research enterprise based at a pediatric medical center, where its discoveries have benefited both children and adults since 1869. More than 1,100 scientists, including seven members of the National Academy of Sciences, 11 members of the Institute of Medicine and 10 members of the Howard Hughes Medical Institute comprise Boston Children's research community. Founded as a 20-bed hospital for children, Boston Children's today is a comprehensive center for pediatric and adolescent health care with 415 beds, proudly celebrating its 150th anniversary. Boston
Children's is ranked the no. 1 Children’s Hospital by U.S. News and World Report. It is the primary pediatric teaching affiliate of Harvard Medical School.
