

Molecular Genetic Pathology
Center for Integrated Diagnostics
Department of Pathology at Massachusetts General Hospital

The Center for Integrated Diagnostics (CID) in the Pathology Service at the Massachusetts General Hospital, a founding hospital of Mass General Brigham, and a major teaching affiliate of the Harvard Medical School, is seeking a dual board-certified molecular genetic pathologist, to join an outstanding academic team of pathologists. The CID is responsible for all aspects of personalized diagnostics at MGH. The main aim of the CID is technology assessment and optimizing care delivery through rapid clinical integration of innovative technologies.

The new faculty member is expected to demonstrate excellent molecular diagnostic knowledge as well as a proven track record in the development and implementation of new technologies and multi-disciplinary collaborations. Specific responsibilities will include molecular assay interpretation and clinical sign out, molecular assay development and validation, and participation in laboratory operations. Additional responsibilities include curriculum development and teaching of our residents, fellows, and medical students. The successful candidate is expected to develop an area of scholarship appropriate to their clinical and/or educational interests. There are considerable opportunities for both clinical/translational and basic research within the department, the institution, and the Harvard system. Candidates with a strong track record of applying innovative approaches (e.g., predictive biomarkers, bioinformatics, digital pathology, artificial intelligence) to answer clinically relevant questions in molecular diagnostics and computational pathology are strongly encouraged to apply. The position is a full-time clinical appointment with a combination of sign-out, research, test development, and educational responsibilities. The successful candidate would work as part of a 35 people team (with 9 molecular-genetic pathology board certified pathologists/PhD's).

Candidates should have an M.D., Ph.D., or M.D./Ph.D. (preferred) degree, with a significant record of publishing in peer-reviewed journals.

Candidates must be board-certified Anatomic Pathology and/or Clinical Pathology, as well as board-certified in Molecular Genetic Pathology.

Academic rank as Associate Professor, Assistant Professor, or Instructor and salary will be commensurate with experience and accomplishments.

Candidates with a preference for a remote position will be given full consideration.

Interested candidates should send a personal statement with research interest, three potential referees and Curriculum Vitae to:

Dr. Jochen Lennerz
Medical Director, Center for Integrated Diagnostics
Associate Chief, Department of Pathology
Massachusetts General Hospital
55 Fruit Street, Jackson Bldg 10th Floor, Suite 1015
Boston, MA 02114
