

Massachusetts General Hospital Cancer Center

Division of Hematology Oncology

Clinical Faculty Position in Hematology/Oncology: Bone Marrow Transplant

The **Massachusetts General Cancer Center** invites applications from board-certified or board-eligible medical oncologists/hematologists for a faculty position emphasizing clinical care and clinical research in the Bone Marrow Transplant Program at the level of Instructor, Assistant, or Associate Professor of Medicine at Harvard Medical School. We are particularly interested in medical oncologists/hematologists with specific expertise in patient-oriented outcomes and survivorship research. The incumbent will join a multidisciplinary team of clinical and laboratory investigators, participating in clinical research, patient care, and teaching. This team oversees a rapidly expanding portfolio of basic, translational, and patient-oriented research advancing the science of hematopoietic stem cell transplant and survivorship care.

A record of success in outcomes, supportive care, and survivorship research is highly valued. Emphasis is placed on the ability to foster multidisciplinary collaboration and build cooperative teams. Women and minority candidates are encouraged to apply. Please submit CV, Letter of Interest, and three references to:

Areej El-Jawahri, MD
