Massachusetts General Hospital, a major Boston teaching hospital and teaching affiliate of Harvard Medical School, seeks a Basic Immunologist with a focus in transplantation to join the Center for Transplantation Sciences (CTS) within the Department of Surgery.

The successful candidate will have expertise in molecular and cellular immunology with an interest in the mechanisms underlying immune activation and immune regulation which could be applied to the development of immunomodulatory therapies to control allo-and/or xenotransplantation rejection. S/he must have an MD and/or PhD and a proven track record of productive laboratory research, federal funding, and effective teaching ability. The successful candidate will also have qualifications to mentor or a demonstrated track record of supervising doctoral candidates and postdoctoral fellows. An appointment at the rank of Professor or Associate Professor at Harvard Medical School will be commensurate with her/his academic accomplishments.

Interested candidates should submit a letter of application and curriculum vitae to:

Joren C. Madsen, MD, D.Phil
