Clinical Director and Physician, Division of Sleep and Circadian Disorders
Brigham and Women’s Hospital

The Division of Sleep and Circadian Disorders at Brigham and Women’s Hospital (BWH) is seeking a distinguished leader in clinical research in the fields of sleep medicine or circadian biology to serve as Clinical Director and Physician in the division. It is intended that the candidate selected will be nominated for consideration as the successor incumbent of the Gerald E. McGinnis Chair of Sleep Medicine at Harvard Medical School.

Qualifications: The Department of Medicine (DOM) seeks a distinguished physician-scientist with a strong academic background, an outstanding laboratory or clinical research program, and clinical leadership experience to serve as Clinical Director and Physician of the Division of Sleep and Circadian Disorders. The candidate is expected to possess international stature as a leader in the field of sleep medicine, as evidenced by scholarly accomplishments, publications in high-impact journals, election to scholarly societies, leadership positions in related societies, service as editor or on the editorial boards of respected journals, and participation on committees and review boards. He or she should also demonstrate an exemplary record of achievement in directing a competitive research program in sleep medicine or circadian biology. Although the strength of the candidate's research program is critically important, the applicant should also have excellent training and foundational experience in the subspecialty of sleep medicine to be able to direct and grow the clinical programs of the Division into world-renown centers. The Clinical Director will help to elevate the clinical sleep program by focusing on developing a highly responsive, accessible clinical sleep program, integrating creative outpatient ambulatory service solutions, such as telemedicine, and creative inpatient service approaches, such as longitudinal follow-up and growth. He or she will focus on clinical integration and effective coordination across departments and divisions, with the goal of delivering high-quality and more efficient patient care, generating access avenues, and pioneering innovative services. The individual must also have a thoughtful focus on the educational and community interests of the Division. Finally, he or she must have exemplary administrative, mentoring, and communication skills to not only lead a large clinical program, but also to engage with institutional, departmental, and divisional clinical leaders, as well as the local, national, and international sleep medicine community.

The Clinical Director and Physician will also participate in the teaching activities of the Division of Sleep and Circadian Disorders in the Department of Medicine at Brigham and Women’s Hospital. These activities will include providing and supervising the teaching of basic and clinical circadian and sleep disorders medicine for undergraduates, medical students, graduate students, postdoctoral fellows, house staff and postgraduate physicians rotating through the Division of Sleep and Circadian Disorders. He or she will also instruct research and clinical fellows in the Division of Sleep and Circadian Disorders at BWH. They will have opportunities to collaborate with 110 faculty within the HMS Division of Sleep Medicine and other faculty within HMS-affiliated hospitals and centers, building upon available educational, research and clinical resources across the community.

Appointment as an Associate Professor of Medicine or Professor of Medicine, Full-Time, at the Harvard Medical School will be commensurate with experience, training and achievements in addition to teaching activities. Suitable candidates will have an MD or an MD-PhD, and Board Certification in Sleep Medicine.
Interested candidates should send a personal statement with research interest, three potential referees and Curriculum Vitae to Natalie Viyaran at nviyaran@bwh.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
