

Beth Israel Deaconess  
Medical Center

HARVARD MEDICAL SCHOOL  
TEACHING HOSPITAL

Director, Center for Health Equity Research and Innovation at Beth Israel Deaconess Medical Center (BIDMC) and Beth Israel Lahey Health (BILH)

The Beth Israel Deaconess Medical Center Division of General Medicine is seeking an inaugural Director of the BIDMC Center for Health Equity Research and Innovation. We seek to recruit a person who will be a major force nationally in efforts to advance research in health disparities and improve healthcare quality, and who will spearhead the development and implementation of important innovations to address these complex issues of equity and diversity that challenge our healthcare systems today.

The Director will harness the dynamic, first-class research, scholarship and educational foundations of the BIDMC/BILH and Harvard systems to lead in groundbreaking initiatives and research focusing on general internal medicine, including the fields of primary care and hospital medicine.

The applicant will be expected to be a nationally recognized physician or social scientist who will move their research program to the Center for Health Equity Research and Innovation in the Division of General Medicine at BIDMC. The applicant will demonstrate established expertise as an investigator and innovator, a proven record of publications and extramural research funding related to health equities and/or diversity, and recognition as a thought leader.

Appointment as Professor or Associate Professor at Harvard Medical School will be commensurate with experience, training and achievements in addition to teaching activities. Suitable candidates will have an MD, MD/PhD, or PhD and Board Certification in Internal Medicine (if the individual is a practicing primary care internist).

Interested candidates should send a personal statement with research interest and Curriculum Vitae to Catherine A. Samson at [csamson@bidmc.harvard.edu](mailto:csamson@bidmc.harvard.edu)

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
