Instructor level Biostatistician recruitment:

The Center for Clinical Investigation within the Department of Medicine at Brigham and Women’s Hospital has an open position for a research focused individual to serve as a biostatistical teacher within the Center for Clinical Investigation. We are seeking candidates with a focus on genetic studies, including design and analysis of clinical studies, estimate sample size and power, interpret results and write statistical sections of papers and grants collaboration with investigators affiliated with Harvard Medical School, grant and protocol development and review, and teaching and mentoring of junior investigators. For the projects in which the successful candidate participates, the person will become an integral part of the research team from research development to protocol design to pre-designed statistical plan to analyses to manuscript preparation. This biostatistician will support statistical analyses and programming of clinical trials from investigator-initiated studies to large scale international clinical trials. Over the next 3-5 years, this faculty member will develop an investigative program in conjunction with the CCI and Endocrinology inclusive of teaching trainees and other faculty about statistical methods and analyses.

Appointment as an Instructor, or Assistant Professor at the Harvard Medical School will be commensurate with experience, training and achievements. Suitable candidates will have a PhD and biostatistical experience.

Interested candidates should send a personal statement and Curriculum Vitae to Yemi Talabi-Oates, CCI Administrative Director, at otalabi-oates@bwh.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related condition or any other characteristic protected by law.
