The Department of Cardiology at Boston Children’s Hospital (BCH) invites outstanding candidates to apply for faculty positions. Anticipated rank as Assistant Professor of Pediatrics, Harvard Medical School will depend on experience, training and achievements.

We are seeking applicants with exceptional potential to become leading independent researchers in related fields. The successful candidate’s research should align with the Department's focus on understanding basic mechanisms in cardiovascular systems and translating fundamental discoveries to the diagnosis and treatment of pediatric cardiovascular disease. In particular, we are interested in investigators working on cardiovascular genetics, cardiac or muscle gene or cell therapy, cardiovascular development, computational biology, stem cell biology, and/or regenerative biology. A commitment to teaching residents and medical students is essential.

Successful candidates will be offered a competitive start-up package to direct innovative and independent research program and to participate in the teaching and other activities of the Department. Suitable candidates will have an MD, PhD, or MD-PhD. For further information about the department, please visit us at: http://www.childrenshospital.org/cardiology.

Interested candidates should forward a cover letter, research statement, curriculum vitae, and arrange to have three letters of recommendation sent to Da-Zhi Wang, Ph.D., or Jane Newburger, MD, MPH, at Marcela.SilvadeOliveira@childrens.harvard.edu.

Women and minority candidates are urged to apply. We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
