Biostatistician recruitment:

The Center for Clinical Investigation within the Department of Medicine at Brigham and Women’s Hospital has an open position for a research focused individual to serve as a biostatistical teacher within the Center for Clinical Investigation. We are seeking candidates with advanced formal training in statistics or biostatistics including design and analysis of observational and experimental studies, and strong statistical computing skills. This biostatistician will support statistical analyses and programming of clinical trials from investigator-initiated studies to large scale international clinical trials.

Appointment as an Instructor or Assistant Professor at the Harvard Medical School will be commensurate with experience, training and achievements. The new Instructor or Assistant Professor will be expected to participate in courses/workshops related to biostatistics, train investigators and students, and hold office hours. Additional teaching responsibilities may be requested based on the candidate’s experience. Suitable candidates will have a PhD and biostatistical experience.

Interested candidates should send a personal statement and Curriculum Vitae to Yemi Talabi-Oates, CCI Administrative Director, at otalabi-oates@bwh.harvard.edu

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related condition or any other characteristic protected by law. Women and minority candidates are particularly encouraged to apply.
