Faculty Position
Laboratory Based Investigator in Kidney Disease
Department of Medicine
Massachusetts General Hospital

The Massachusetts General Hospital Nephrology Division is seeking to recruit a laboratory scientist focused on basic investigation of kidney disease, with laboratory space located at the Charlestown Navy Yard research facility. The Division carries out basic and translational research using cell, molecular, and structural biology techniques using a number of model organisms. We seek a junior faculty member who will grow their own program, but also interact and collaborate with other members of the Division.

Appointment as an Instructor or Assistant Professor at the Harvard Medical School will be commensurate with experience, training and achievements in addition to teaching activities. Suitable candidates will have a PhD, MD, or MD-PhD.

Interested candidates should send a personal statement with research interests and Curriculum Vitae to Daniela Mancini at dmancini@mgh.harvard.edu

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
