The Division of Endocrinology, Diabetes and Hypertension, Department of Medicine, at Brigham and Women’s Hospital (BWH) seeks candidates for a full-time scientist or physician-scientist to develop and conduct an independent research program focused upon thyroid disease and physiology. MD, MD/PhD, or PhD candidates will be considered. Working together with a strong interdisciplinary team of faculty physicians and scientists at Dana Farber Cancer Institute and BWH, such a candidate should bring an outstanding background and training in the field of thyroidology such as thyroid nodule or cancer metabolism, thyroid cancer genomics, or thyroid hormone physiology. It is anticipated that the majority of this candidate’s time will be laboratory based, while actively partnering with physicians and scientists in the fields of endocrinology, endocrine surgery, and oncology. BWH is an international referral center for thyroid clinical care and discovery. Projects led by this candidate would seek to integrate into the strong existing multi-disciplinary effort, and to bridge clinical experience and findings together with new molecular science and discovery. It is expected that candidates will have or will seek independent grant funding to help support their work. Academic rank of Instructor/Assistant Professor level at Harvard Medical School will be commensurate with experience, training and achievements. The successful candidate will also engage in teaching and mentoring of research fellows and students, while pursuing a program of laboratory research.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law. Women and minority candidates are particularly encouraged to apply.

Interested candidates should send a curriculum vitae and names, addresses, and phone numbers of three references to: Dr. Erik Alexander, Chief, Thyroid Section, Division of Endocrinology, Diabetes and Hypertension, Brigham and Women’s Hospital, 221 Longwood Ave, Boston, MA 02115, or to kquach@partners.org.
