Faculty Position
Laboratory-Based Investigator in the
Department of Medicine
Massachusetts General Hospital

The Massachusetts General Hospital Division of Infectious Diseases is seeking a laboratory scientist focused on basic investigation of antibiotic resistance. Areas of experience include gene cloning and expression, protein purification, assays of protein-protein interactions, assays of RNA expression, and DNA and RNA sequence analysis.

Appointment as an Instructor or Assistant Professor at the Harvard Medical School will be commensurate with experience, training, and achievements in addition to teaching activities. Suitable candidates have a PhD, MD, MD-PhD or equivalent.

Although several years of experience would be advantageous, less experienced candidates with exceptional promise will also be considered.

Interested candidates should send a personal statement with research interests, three potential referees, and Curriculum Vitae to Barbara Matteson at BMATTESON@mgh.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
