Clinical Investigator

The Dana-Farber Cancer Institute and the Brigham and Women’s Hospital are inviting applications for positions for clinical investigators. The ideal candidates should have a strong background in laboratory-based research coupled with experience in clinical investigation. The candidates should be interested in identifying novel agents and conducting relevant pre-clinical studies, either in their own laboratory or jointly with other laboratory-based investigators. Applicants should also have history of designing and executing innovative clinical trials in patients with cancer. Candidates with an interest and/or experience in carrying out studies with immunotherapeutic agents are encouraged to apply. Applicants with these activities will be supported by the infrastructure of the Center for Cancer Precision Medicine and the Belfer Institute for Applied Cancer Science as well as by the Disease Center(s) that support the clinical investigator’s interests. Applicants should have an MD or MD/PhD degree, with training in Medical, Pediatric, Radiation or Surgical Oncology. Clinical care responsibility will be limited to 25% in an effort to provide protected time for research. Highly competitive start-up packages to support both clinical and wet or dry laboratory efforts will be provided. Academic appointment at Harvard Medical School at the level of Instructor or Assistant Professor will be commensurate with experience and institutional policies. The successful candidate will also engage in teaching medical students, house-staff, and fellows in the clinic and inpatient settings.

Please submit a letter with a summary of research interests, curriculum vitae and the names and email addresses of three potential references to:
