Clinical Psychologist, at the Massachusetts General Hospital Lurie Center for Autism

The Lurie Center for Autism, a division of the Department of Pediatrics at Massachusetts General Hospital for Children (MGHfC), is seeking a full-time clinical psychologist who specializes in the neuropsychological and diagnostic assessment of autism spectrum disorder and other neurodevelopmental disabilities. The candidate should also have experience in conducting evidence-based short-term therapy with individuals with neurodevelopmental disorders.

The Lurie Center for Autism is an integrated clinical, research, training, and advocacy program dedicated to treating individuals with autism spectrum disorders (ASD) and other developmental disorders across the lifespan. The Lurie Center is unique in its multidisciplinary approach that integrates the services of neurology, developmental pediatrics, gastroenterology, internal medicine, psychiatry, neuropsychology, occupational therapy, physical therapy, speech language pathology, educational services, and family support services at its Lexington location. More information about our many programs is available at www.luriecenter.org. We are seeking a strong clinical psychologist or neuropsychologist to join our dynamic team.

Responsibilities will include both neuropsychological testing and therapy for individuals with ASD in an outpatient, multidisciplinary medical clinic. Candidates with interest and specialized training in the application of cognitive-behavioral therapy, behavior management/parent guidance, group therapy, and/or family therapy in addition to neuropsychological testing experience are encouraged to apply; expertise in the application of these therapies within the field of ASD is preferred. The position involves close collaboration with the multidisciplinary team to address the various diagnostic, behavioral, and neuropsychiatric needs of their patients and consultation with community providers and schools. Additional responsibilities will include teaching and supervision of psychology and medical students, interns, and fellows; and psychiatry, neurology, and pediatrics residents and fellows. This appointment will be at the Instructor or Assistant Professor rank.

Requirements for employment include completion of an APA-accredited doctoral program in psychology (PhD or PsyD) with specialized postdoctoral-level training in neuropsychological and psychological assessment, as well as licensure or license-eligibility in the Commonwealth of Massachusetts.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.

Applicants should send a letter of interest and their curriculum vitae to:
