Openings for Faculty in Renal Medicine at Brigham and Women’s Hospital

Brigham and Women’s Hospital (BWH) seeks applicants for faculty positions interested in the clinical or translational science of kidney disease. Candidates will have an MD, PhD or both and be accomplished researchers and mentors with several years of relevant experience. Depending on qualifications there may also be a clinical role. We seek candidates who have outstanding research accomplishments or potential. We are, in particular, looking for broadly educated and multidisciplinary applicants, who can interact with a wide range of BWH and Harvard faculty. The successful candidate will also engage in teaching students and fellows in the clinical and/or laboratory setting.

Academic rank of Instructor/Assistant/Associate Professor at Harvard Medical School and hospital rank of Associate Biologist or Associate Physician at BWH will be commensurate with experience, training and achievements.

The Division of Renal Medicine at BWH benefits from outstanding faculty and trainees engaged in basic, clinical and translational research with multiple collaborations. Please forward a cover letter, curriculum vitae, statement of research interests, copies of up to three representative papers and request three recommendation letters. We encourage candidates to apply by April 1, 2020 but will continue to review applications until the positions are filled.

Applications should be sent to:

Joseph V. Bonventre, MD, PhD
Chief, Division of Renal Medicine
Brigham and Women’s Hospital
bwhrenfacsearch@partners.org

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related conditions or any other characteristic protected by law. Women and minority candidates are particularly encouraged to apply.
