Clinical Endocrinologist

Description

Assistant in Medicine – Full-time physician sought by Massachusetts General Hospital/MGPO to perform clinical duties as part of the MGH Diabetes Center and Endocrine Associates clinic in the Division of Endocrinology, including outpatient and inpatient care. Physician will see patients with diabetes and general endocrine disorders. Position will be focused more on general endocrine and bone/mineral metabolism disorders than on diabetes. Will have teaching responsibilities and academic appointment will be at the Instructor/Assistant Professor level at Harvard Medical School and determined by the applicant's credentials.

Please submit CV and cover letter by email to Josue Espinoza at jdespinoza@mgh.harvard.edu.

Requirements

Requires M.D. degree or equivalent with training in Internal Medicine and Endocrinology via completion of ACGME-accredited residency in internal medicine and a fellowship in endocrinology, diabetes, and metabolism. Must be board certified in Endocrinology.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
