Division Chief, Adolescent and Young Adult Medicine Massachusetts General Hospital *for Children*

The Division of Adolescent and Young Adult Medicine at the MassGeneral Hospital for Children is seeking a Chief to lead our team of seven physicians. This is a full-time academic leadership position that includes clinical, research and teaching responsibilities.

The position of Chief of Adolescent and Young Adult Medicine at MassGeneral Hospital for Children includes an appointment at Harvard Medical School at an academic rank of Assistant Professor or Associate Professor commensurate with experience, training and scholarly achievements. Board certification in Adolescent Medicine is strongly preferred, although candidates with Board Certification in a complementary subspecialty may be considered.

Applications are welcome from candidates with more than seven years of experience post-training with evidence of management responsibilities and leadership in an academic setting. Candidates must have a strong record of collaboration and possess the ability to engage a broad base of stakeholders to work towards a shared vision for the division. The successful candidate should have a significant record of scholarship and academic achievements in clinical investigation, innovation, and/or education.

The division provides clinical outpatient and inpatient services to primary care and consultative patients and serves as a center for transition from pediatric to adult medicine. The candidate should be comfortable managing the care of medically complex patients and providing consultative services to adolescents and young adults with eating disorders, gynecology/reproductive care needs, mental health issues and obesity. Division members also provide inpatient-attending services for patients with eating disorders. Faculty members are closely involved in teaching residents and medical students as well as in postgraduate educational settings, advocacy and administration. In addition, the Chief will have the opportunity for program development within the department (i.e. addiction treatment, gender affirming care, offering LARCs) and will assist the Department of Pediatrics in advancing its commitment to equitable care and to reaching the communities that MassGeneral Hospital serves.

US News and World Report ranks Massachusetts General Hospital #6 on the best hospitals honor roll, and #1 in research with sixteen adult and five pediatric specialties nationally ranked. MGH has the largest hospital-based research program in the United States with a budget of 1 billion dollars in 2019. The hospital is a founding member of MassGeneral Brigham, the largest not for profit healthcare system in New England.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
