

MULTI-OMICS AND SYSTEMS EPIDEMIOLOGIST

ASSISTANT/ASSOCIATE PROFESSOR

The Division of Preventive Medicine, Department of Medicine, at Brigham and Women's Hospital and Harvard Medical School seeks an Assistant or Associate Professor level scientist in multi-omics and systems epidemiology. Applicants should possess a PhD and/or MD degree and have several years of relevant experience. Opportunities exist for collaboration with an active research group and access to large cohorts and blood/DNA repositories. Preference will be given to individuals who have demonstrated the ability to obtain grant support for their research. Applicants should have well documented commitment to epidemiologic research, and expertise in integration of multi-omics biomarker research (genomics, epigenetics, transcriptomics, metabolomics, and/or proteomics) in relation to chronic disease epidemiology or aging research. Appointment at the level of Assistant or Associate Professor and compensation will be commensurate with experience and institutional policies, including teaching activities with Harvard-affiliated students/trainees.

Please send CV, a description of research goals and accomplishments, a summary of current and past grant support, names of at least three references, and representative reprints of 3-5 original reports by February 15, 2021 to:
