

Faculty Position in Environmental/Reproductive Epidemiology

Channing Division of Network Medicine

Brigham and Women's Hospital and Harvard Medical School

The Channing Division of Network Medicine (CDNM) at Brigham and Women's Hospital seeks to recruit a new faculty member in the area of environmental/reproductive epidemiology to help build our research program in this area, who has expertise in statistics, environmental epidemiology, and reproductive health. CDNM hosts the ongoing Nurses' Health Studies, with 40 years of follow-up and repeated detailed information on diet and lifestyle from over 175,000 women. From this and many other cohorts, we have DNA samples from more than 200,000 individuals. The Division has its own freezer storage system and extensive computer resources.

The Division seeks a junior faculty applicant to build their own research program in environmental/reproductive epidemiology that will, at least in part, leverage the extensive study populations, biological samples, and genetic/genomic data available within the Division. The new faculty will develop collaborations with existing faculty who have expertise in statistics, bioinformatics, epidemiology, reproductive and genetic epidemiology, and genomics of complex human diseases. The successful candidate will engage in teaching students and post-doctoral fellows.

Academic appointment as Instructor or Assistant Professor rank at Harvard Medical School will be commensurate with the applicant's experience. Secondary appointment at the Harvard T.H. Chan School of Public Health will also be considered for appropriate applicants.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related condition or any other characteristic protected by law. Women and minority candidates are particularly encouraged to apply.

Reference information, including academic and/or employment records, final evaluations and recommendations for future employment will be required of the leading candidate.

Applicants should send a letter detailing their interest, the names and contact information for three references, and CV to the Chair of the Search Committee by December 1, 2020:

Meir Stampfer, M.D., Dr.P.H.

Professor of Medicine

Channing Division of Network Medicine

181 Longwood Avenue, Boston, MA 02115
