

Maternal-Fetal Medicine Specialist with Global Health/ Public Health Research Expertise

The Department of Obstetrics and Gynecology, Harvard Medical Faculty Physicians at Beth Israel Deaconess Medical Center in Boston is seeking a full-time Maternal-Fetal Medicine specialist to join both the Division of Maternal Fetal Medicine and Prenatal Genetics and the Division of Global and Community Health. Candidates must be BC/BE in Maternal-Fetal Medicine. We are specifically interested in expanding our global health/public health obstetric research portfolio with an MFM researcher who has a background and interest in pursuing global and/or public health research. The ideal candidate will demonstrate a commitment to research and have a strong interest in actively participating in residents and fellow's education. Care will take place both at the main campus in Boston, as well as our affiliate hospitals in the greater Boston area. Academic appointment as instructor, assistant, or associate professor at Harvard Medical School and salary will be commensurate with experience and qualifications, and a commitment to teaching.

Send inquires and CV to: Blair Wylie, MD, Division Director, Maternal-Fetal Medicine, Department of Obstetrics and Gynecology, Beth Israel Deaconess Medical Center, Attn: Riki MacKillop, Manager, 330 Brookline Avenue, KS3, Boston, MA 02215 or email: rmackill@bidmc.harvard.edu

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
