

Lab-based Physician Scientist

The Department of Medical Oncology at the Dana-Farber Cancer Institute (DFCI) and the Brigham and Women's Hospital (BWH) is seeking a full-time medical oncologist (MD or MD/PhD) for an academic, wet-laboratory, investigator position focused on basic and translational approaches to cancer. The candidate must have an MD or MD/PhD and a proven track record of outstanding laboratory research in cancer. Multiple opportunities exist for collaboration with basic and translational researchers in our team science-oriented program. The successful candidate is expected to develop, participate and lead, an independent laboratory and take an active role in the Division's multidisciplinary clinical activities.

The position is based in both the Department of Medical Oncology at the DFCI and the Department of Medicine at the BWH and includes collaboration with other institutions affiliated with the Dana-Farber/Harvard Cancer Center and the Harvard Medical School.

The investigator is expected to participate in Harvard University courses/workshops for medical students and fellows taught in the School of Medicine and supervise postdoctoral fellows and graduate students.

The academic appointment will be at the Instructor, Assistant or Associate Professor level at Harvard Medical School and determined by the applicant's credentials. Salary and benefits will be competitive with other institutions. Applicants should have an MD or MD/PhD degree and should be board certified or board eligible in Internal Medicine and Medical Oncology.

Interested candidates should submit a letter of interest by email along with their CV and the names and email addresses of three references to:

James A. DeCaprio, MD
