

The Sleep Medicine Epidemiology Program at the Division of Sleep and Circadian Disorders at Brigham and Women's Hospital invites applications for a faculty position at the level of Instructor in Medicine at Harvard Medical School. The instructor will play a leadership role in design and execution of studies investigating the role of genetic variation in sleep and related phenotypes, and in the potentially different genetic basis of these health measures across the sexes. Interest and expertise in statistical genetics and methodology are preferred. The faculty will work collaboratively in a team of statisticians, epidemiologists, and clinicians, and mentor postdoctoral fellows and programmers. The faculty will also teach Harvard learners. The faculty is encouraged and will be supported to develop his/her own methodological research area.

Interested candidates should send their curriculum vitae, 1-page research statement, contacts of three references, and a cover letter to Dr. Susan Redline sredline@partners.org or Dr. Tamar Sofer tsofer@bwh.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability status, protected veteran status, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
