The Massachusetts General Hospital (MGH) Cardiovascular Research Center invites applications for a tenure-track faculty position in Computational Biology/Bioinformatics at the Instructor, Assistant Professor or Associate Professor level. The faculty appointment will be in the Department of Medicine at Massachusetts General Hospital. The positions provide an attractive start-up package and outstanding opportunities for collaboration with basic and translational investigators across the MGH, Harvard and MIT scientific communities.

Applicants must hold a PhD and/or MD degree (or the equivalent) and have significant expertise in computational biology and bioinformatics. Experience in cardiovascular research is a positive but is not required. Applicants are expected to develop a program of research/scholarly investigation in computational biology and collaborate with investigators in the Cardiovascular Research Center and wider research community at the MGH. The applicant will also be expected to contribute to the teaching of medical students, residents and research fellows in the MGH and Harvard Medical School systems.

Interested candidates should email as a single PDF: a cover letter, detailed curriculum vitae, and a short description (~2 pages) of future research plans, by October 10th, 2021 to:

Dr. David E. Sosnovik, Search Committee Chair
