Curriculum Committee

Committee Charge

The DMD Curriculum Committee is comprised of members of both biomedical science and clinical science areas and meets regularly throughout the academic year. The primary goals of the Committee are to direct and oversee all aspects of the predoctoral education program. Committee oversight includes the monitoring of curricular context with respect to the goals and objectives of the School and current Accreditation Standards, reviewing existing courses, consideration of new course proposals, and review of time allocations and sequencing for coursework. In addition, the Committee oversees the course evaluation and educational outcomes assessment programs of the School.
