

## Seeking Candidate for Pediatric Infectious Diseases, Clinical Attending Faculty, Full-Time Position Boston Children's Hospital

The Division of Infectious Diseases at Boston Children's Hospital in Boston, Massachusetts is seeking to recruit an outstanding pediatric ID physician to provide exceptional clinical care within our inpatient and outpatient consulting practices. The successful applicant is expected to be board-certified or board-eligible in pediatric infectious diseases and have a strong commitment to patient care and trainee education.

The position involves primarily clinical and teaching responsibilities:

- Inpatient pediatric infectious diseases consultation
- Outpatient infectious diseases clinic
- Teaching of medical students, residents, nurse practitioners, and clinical fellows

Candidates with an interest in developing areas of clinical expertise such as inpatient and outpatient practice guidelines, clinical innovations such as telemedicine, community outreach and patient education, patient safety and quality improvement, medical education, or clinical research are encouraged to apply. Protected time for such activities will be included based on the candidate's career goals. The position includes a faculty appointment at Harvard Medical School. Academic rank will be Instructor, Assistant Professor, or Associate Professor commensurate with qualifications.

Boston Children's Hospital is an academic teaching hospital and a world-renowned medical and surgical referral center. The division of Pediatric Infectious Diseases includes over 30 faculty, nine fellows, and nearly 50 research staff and postdoctoral fellows. Our inpatient consult services include both general ID and immunocompromised ID teams. Our outpatient clinics include general pediatric infectious diseases, immunocompromised infectious diseases, perinatal infections management, HIV care, and outpatient parenteral antibiotic therapy (OPAT). We have a well-established program in pediatric antimicrobial stewardship and hospital infection control and prevention. Research in the division spans basic science, clinical investigation, and epidemiology and population health.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.

Interested applicants should forward their curriculum vitae and a cover letter detailing their interest to Tanvi Sharma, MD, MPH (<u>Tanvi.sharma@childrens.harvard.edu</u>).
