

Pediatric Research Neuropsychologist:

The Cardiac Neurodevelopmental Program at Boston Children's Hospital is seeking a full-time neuropsychologist to join our team as Research Director. The Cardiac Neurodevelopmental Program serves individuals with congenital heart disease from the prenatal period to young adulthood. The ideal candidate will have expertise in research in cardiac neurodevelopment including experience acquiring funding, designing and carrying out studies, collaborating with a multidisciplinary team, preparing manuscripts, and engaging in speaking opportunities nationally and internationally. Areas of particular interest include children and adolescents with complex medical and neurodevelopmental profiles, including those with autism, intellectual disabilities, anxiety, and/or executive function challenges. We are seeking an experienced individual with at least 3-5 years post-graduate employment who can assume a leadership role in providing teaching and training to postdoctoral psychology fellows. Experience in cardiac neurodevelopment is strongly preferred. Experience in working with Spanish-speaking populations is a plus. An emphasis on multidisciplinary collaboration is key. Appointment at Harvard Medical School at the Instructor, Assistant Professor, or Associate Professor level will be provided commensurate with experience and will require ongoing teaching.

Letters of application detailing relevant experience and a recent CV should be sent to Cleo Hereford via e-mail cleo.hereford@childrens.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
