

## Assistant or Associate Professor Position at Massachusetts Eye and Ear – Auditory Neuroscience and Related Fields

The Eaton-Peabody Laboratories (EPL) at the Massachusetts Eye and Ear (MEE) and the Department of Otolaryngology – Head and Neck Surgery (OHNS) seek applications from researchers with expertise in neuroscience, biomedical engineering, and related fields. EPL is among the world's largest and longest-standing auditory research centers, with 16 independent federally funded laboratories working on the full scope of hearing research, from stereocilia to cortical interneurons, and from basic science to translational research in human subjects. EPL's newly renovated laboratories occupy ~15,000 square feet on the main campus of MEE in the heart of Boston, packaging the resources and infrastructure of a top academic research center into an active hospital setting. EPL Investigators work closely with their clinician-scientist colleagues and collaborate with other OHNS laboratories studying the vestibular system, olfaction, head and neck cancer, and speech motor control. EPL Investigators hold faculty appointments at Harvard Medical School and are heavily involved in mentoring graduate students and fellows enrolled in Harvard and MIT training programs, especially the Harvard PhD Program in Speech and Hearing Bioscience and Technology. The successful candidate will have an outstanding record of basic science achievement and an innovative research program. While a background in auditory system research is encouraged, applicants who can leverage their background in a related field to catalyze progress and collaboration in hearing research are also encouraged to apply.

To apply, please submit a cover letter, CV, description of research accomplishments, statement of future research plans, statement on mentoring approach, and a completed application form via: <https://apply.interfolio.com/TBD>. Contact information for three references will be required; the reference letters will be requested separately by MEE. We will consider applications on a rolling basis from September 1 to November 1, 2023. Inquiries regarding the search should be directed to: Catherine Clarke, Director of OHNS Research Operations, [CFCLARKE@MEEI.HARVARD.EDU](mailto:CFCLARKE@MEEI.HARVARD.EDU).

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
