

Bioethicist in Genetics and Neurogenetics
Instructor, Assistant or Associate Professor Appointment
Division of Genetics and Genomics, Department of Pediatrics

Applications are invited for a faculty position as Bioethicist with focus in Genetics and Neurogenetics in the Division of Genetics and Genomics, Department of Pediatrics at Boston Children's Hospital and Department of Pediatrics at Harvard Medical School. We are seeking an outstanding MD or PhD in a clinical discipline to join our vigorous clinical and research programs in the diagnosis and care of children with genetic and neurogenetic disorders. There will be the opportunity to participate in our expansive and growing translational and clinical research programs with relevance to Genetics and Genomics. Advanced Clinical and Research fellowship training as well as a graduate degree in Bioethics, required. Demonstrated leadership in national and international professional societies preferred, as well as strong publication history.

The Division consists of over 20 medical and biochemical geneticists and more than 15 laboratories, and resides within a very strong research and clinical community in genetics, developmental biology and related disciplines throughout the Harvard Longwood Medical Area. The successful candidate also will be expected to take advantage of the many opportunities for teaching house staff, research fellows, and medical students at Boston Children's Hospital and will be proposed for a **Harvard Medical School faculty appointment at the level of instructor, assistant or associate professor depending on qualifications.**

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.

Please submit a letter of application, including a description of clinical, patient care and research interests (3 page maximum), a curriculum vitae, and the names of three (3) potential references **by September 30, 2023**. Address materials to Dr. Christopher Walsh, Division Chief of Genetics and Genomics, Boston Children's Hospital, and submit by email to Cristina Necula at cristina-necula@childrens.harvard.edu.

We particularly encourage applications from women and minority candidates.
