

DANA-FARBER CANCER INSTITUTE
Dedicated to Discovery...Committed to Care

Clinical Investigator

The Center for Cancer Therapeutic Innovation (CCTI) at the Dana-Farber Cancer Institute (DFCI) and Brigham and Women's Hospital (BWH) is seeking a full-time medical oncologist (MD or MD/PhD) for a clinical investigator position to be based primarily within the CCTI. CCTI (the DFCI early drug development program) is an integrated clinical/translational research center that brings together specialized cancer expertise to develop and conduct innovative early phase clinical trials spanning multiple malignancies with the goal of accelerating the development of novel therapeutics into successful treatments tailored to individual patients.

The successful candidate will be an integral member of the CCTI and be expected to write, lead, and see patients on early-phase, cross-malignancy trials as well as contribute to the broader development of translational and clinical research across malignancies within the center. Candidates may have a disease focus with the potential for joint appointment within a disease division as well. The successful candidate will be an integral partner with other core faculty in developing trials that cross malignancies with opportunities to help direct clinical operations within the center.

The position is based in both the Department of Medical Oncology at DFCI and the Department of Medicine at the BWH and includes collaboration with other institutions affiliated with the Dana-Farber/Harvard Cancer Center and the Harvard Medical School. The chosen candidate will be teaching fellows and students in the outpatient setting. Candidates must be board certified or eligible in medical oncology.

The academic appointment will be at the Instructor/Assistant/Associate level at Harvard Medical School and determined by the applicant's credentials. Salary and benefits will be competitive with other institutions. Applicants should have an MD or MD/PhD degree and should be board certified or board eligible in Internal Medicine and Medical Oncology.

Interested candidates should submit a letter of interest by email along with their CV and the names and email addresses of three references to:
