The Department of Pediatrics at Mass General for Children is recruiting a new and dynamic Chief with a strong academic reputation for its [Division of Pediatric Endocrinology](#). The position includes an appointment at the Assistant Professor or Associate Professor rank at Harvard Medical School.

The Chief will oversee an active clinical practice and will lead a dynamic team of pediatric endocrinologists. The candidate must be board certified in Pediatric Endocrinology. The candidate will be responsible for overseeing the academic, clinical, and training missions of the Division of Pediatric Endocrinology and will be expected to lead an independent research program. This position includes requisite initial support and research space. Massachusetts General Hospital, its affiliated hospitals, and other Boston-area programs provide an unparalleled environment to pursue and develop research opportunities and collaborations.

The US News and World Report Honor Roll ranks the Massachusetts General Hospital among the top hospitals in the US, with multiple adult and pediatric specialties ranked nationally. MGH has the largest hospital-based research program in the United States with a budget that exceeds 1 billion dollars annually and is the only hospital that has won both equity and community health awards from the American Hospital Association and the Association of Academic Medical Centers. The hospital is a founding member of the MassGeneral Brigham Integrated Health Care System, the largest not-for-profit healthcare system in New England.

Interested applicants should contact Scott Hadland, MD, MPH, MS, Chief, Division of Adolescent and Young Adult Medicine, Mass General for Children at shadland@mgh.harvard.edu.
