

Pediatric Endocrinologist  
Massachusetts General Hospital  
MassGeneral for Children  
Department of Pediatrics  
**Division of Pediatric Endocrinology**

The Division of Pediatric Endocrinology at Massachusetts General Hospital (MGH) and Mass General for Children (MGfC) invites applications for full-time appointment as an Instructor, Assistant Professor, or Associate Professor to join a multidisciplinary team of clinicians and researchers. The successful candidate will have earned an M.D. or M.D./Ph.D. or equivalent and be BC/BE in Pediatrics and Pediatric Endocrinology.

As a candidate for the Clinician Expertise and Innovation Track, or Research Track, the applicant must have expertise in outpatient clinical activities, inpatient attending responsibilities, and teaching and mentorship of students, residents and pediatric endocrinology trainees. The division is in the process of expanding its subspecialty clinics, and the candidate will have the opportunity to develop a subspecialty niche depending on his/her area of interest and/or expertise. A portion of his/her time may be devoted to research and other scholarly activities. Applicants interested in leadership positions may have the opportunity to develop this interest.

The Division of Pediatric Endocrinology consists of fourteen successfully established pediatric endocrinologists and two nurse practitioners, providing care to patients representing the entire spectrum of endocrine conditions. The Division of Pediatric Endocrinology provides patient and family centered care to its large patient base, and includes four nurse certified diabetes educators, a dietician and a psychologist. MGfC offers the dual advantage of a children's hospital (including an 18 bed NICU, a 14 bed PICU and a 6 bed Pediatric Emergency Department) within the internationally renowned Massachusetts General Hospital, consistently ranked as one of the best general hospitals in the world. Pediatric endocrinologists and other pediatric specialists benefit from a vast campus with outstanding clinical resources and research activities within the Mass General Brigham system, the largest health care network operating within the greater Boston area.

Interested candidates should send curriculum vitae and a brief letter outlining their interests to:

Deborah Mitchell, MD  
Interim Chief, Division of Pediatric Endocrinology  
Department of Pediatrics  
Massachusetts General Hospital  
55 Fruit Street, CPZS 5-539  
Boston, MA 02114  
ATTN: Nancy Radford
