

## Senior Clinical, Basic and/or Translational Scientist in Pathology Beth Israel Deaconess Medical Center, Boston

The Department of Pathology and the Cancer Center at Beth Israel Deaconess Medical Center (BIDMC) announces an opportunity for a senior basic or translational scientist in Cancer Biology with an academic appointment of Associate Professor or Professor of Pathology. The candidate will be responsible for the development of a program that may include signal transduction, cancer genomics and epigenetic regulation, novel therapeutics, or defining biomarkers predictive of therapeutic resistance or toxicity. The candidate should have demonstrated prominence in the field as shown by a track record of independent funding potentially including R01 level grants, leadership of consortium projects in the field, experience with program level leadership in basic science and translational science, mentorship of early career investigators.

The candidate will also serve as part of the scientific leadership of the Cancer Biology Program within the Cancer Research Institute (CRI). The candidate will work in close collaboration with the Cancer Center Director, Cancer Research Institute leadership as well as the Department Chair of Pathology to realize these goals including the establishment of a robust research program under their own leadership, strategic recruitments and fostering the career development and growth of early and mid-career investigators at the center. The candidate will potentially oversee a mentorship program for postdoctoral associates.

The successful candidate will have a national reputation and a track record of successful clinical, translational, and/or basic laboratory research. Candidates for this position must meet criteria for appointment as Professor or Associate Professor of Pathology at Harvard Medical School. The successful candidate must have demonstrated scholarly activities with achievements in basic or clinical research and possess potential for program development, and teaching and mentorship abilities.

Beth Israel Deaconess Medical Center, the tertiary care hospital of Beth Israel Lahey Health, is a member of the Dana-Farber Harvard Cancer Center, an NCI-designated comprehensive cancer center. Salary and benefits will be competitive with other institutions. Applicants should have a PhD, MD or MD/PhD degree. The candidate will be put forward for Professor or Associate Professor level appointment at Harvard Medical School.
