

Senior Genitourinary Medical Oncology Clinical Leader/Investigator, Beth Israel Deaconess Medical Center, Boston

The Department of Medicine and the Cancer Center at Beth Israel Deaconess Medical Center (BIDMC) announces an opportunity for a senior Genitourinary Medical Oncology Clinical Leader/Investigator with an academic appointment of Associate Professor or Professor of Medicine at Harvard Medical School. BIDMC has a robust clinical/translational/basic research program in genitourinary malignancies. The clinical program features multidisciplinary collaboration between surgery, radiation oncology, interventional radiology, pathology and medical oncology. There is a thriving clinical trials program including phase I studies in the Experimental Therapeutics program of novel agents and immunotherapies, phase II studies, and consortium lead multicenter trials. The BIDMC also co-leads the Dana-Farber Harvard Cancer Center SPORES in Renal Cell and Prostate Cancer. The candidate will work in close collaboration with the Cancer Center Director, the Chief of Medical Oncology, and the Department Chair of Medicine to support and continue growing the program. This includes establishment of a research program under their own leadership, strategic recruitments, and fostering the career development and growth of early and mid-career investigators.

The successful candidate must have demonstrated scholarly activities and have prominence in the field, with achievements in basic or clinical research, and possess potential for program development, teaching and mentorship. Areas of expertise may include leadership in clinical trial development, experimental therapeutics, immunotherapy, translational studies such as biomarker discovery for genomic and molecular features predictive of disease course, treatment response and resistance mechanisms.

Beth Israel Deaconess Medical Center, the tertiary care hospital of Beth Israel Lahey Health, is a member of the Dana-Farber Harvard Cancer Center, an NCI-designated comprehensive cancer center. Salary and benefits will be competitive with other institutions. The candidate will be put forward for Professor or Associate Professor level appointment at Harvard Medical School.

Please send letters of interest, curriculum vitae and bibliography in one document by emailing Elana Grandberg at: egrandbe@bidmc.harvard.edu.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.
